BACKGROUND

Fifteen years in the Montréal underground

Maudite Machine started playing in Montréal in 2010, when Piknic Électronik and the SAT were the two rooms every local DJ wanted. In 2013 he played the Techno Parade in Paris on the MEG float. He has played Piknic and the SAT ever since, along with the Igloofest afters, the Phi Centre, Fonderie Darling, Théâtre Fairmount, Québec festivals from TOTEM and Illusion to Groove and Bass, and Future Forest in New Brunswick. In 2026 he played OKAMI Festival in France, on the Selva stage.

His sets move between deep techno and indie dance. The bass rolls, the changes come slowly and under the surface, and after a while the room stops watching the booth and moves as one. He plays it two ways: as a DJ on CDJs, and as a hybrid live set where synths and grooveboxes drive the sequences in real time.

He founded VRSTL Records, an independent label that has released 21 EPs and 2 albums from artists in Québec, Brazil, Argentina and Europe. His own catalogue on VRSTL runs to 13 releases since July 2024, including Limbos (October 2025), a nine-track album about a complete stop and an unexpected return.

He also teaches Ableton Live production, remotely and in person, and has trained more than 70 students. Based between Canada, France and Spain, he is available for club and festival dates across France, Spain and the rest of Europe, and still playing Canada.

DISCOGRAPHY

Limbos, album, VRSTL Records · October 2025 · 9 tracks

The space between the end and the new beginning. The album turns a complete stop, the passage to the other side and an unexpected return into electronic impulses. Each track works the territory where consciousness dissolves and reforms.
